Awareness of Trends in Technology regarding IT

When one is working with technology, only technical skills are not important. These skills should be supplemented with other sub-skills. The industry is in search of personnel who besides having technical skill are also well versed with other trends in the industry. Experience with computer programs, requirement gathering information, analyzing information and demonstrating effective time management are such important trend and students need to be aware of this. In view of this, Mr. Dharmendra Sharma was invited to brief students about it.

Awareness of Trends in Audio-Visual Technology:

Since these students were embarking on their journey towards making their own degree film, the faculty member took them through the various innovations in technology that they could possibly use in their film making process. There were discussions around VR technology and use of 4K 3D cameras along with drone technology, especially because all of these students were working on projects where the cities Mumbai and Kolkata were protagonists within the script. The students were also advised to explore the use of Iphone (which some of them already owned) to cut down on production costs. Suggestions were also given for procuring iPhone gimbals for the same purpose. Some of the suggestions shared in this lecture were later adopted by the students in their degree filmmaking process.

Physical Fitness Activity Summary Report

The sporting spirit is essential along with the academic development of students. Some students are inclined towards sport which they develop using the existing infrastructure on the campus. The sports competition ITS (In true Spirit) is a routine event where students participate at individual and team level. But SCMC has always viewed such events as the event for all students. The day is considered as non-instructional day.

Soft Skill Sessions

Students who are unable to perform well, both, academically and non-academically are listed out and are provided with some sessions to motivate them and perform better as a student and a team member. The sessions take place during the summer and Diwali vacation. Along with academic inputs, students are introduced with certain soft skills. The focus is mainly on basic communication skills, inter-personal relations, and team spirit. These sessions are supplementary to the Academic Improvement Program. The purpose is to improve students not only academically but also to inculcate soft skills among them, so that they can perform better in the next semester. Soft skills sessions are aligned with the academic improvement programme.
